SOFTWARE ENGINEERING APPLICATIONS

DevSync | Repo: GitHub | Live: Go to App

Full Stack Engineer — *MongoDB, Express, React, Redux, Node.js*

+ Summary: Developed a full-stack Social Media platform to help facilitate the job hunt for web developers around the world.
+ Role: Backend, Express server/routes, Mongoose queries, serve data to the frontend in React
+ Utilized: MongoDB, Express, React, Redux, Node.js, JWT, JavaScript

Slick's Slices | Repo: GitHub | Live: Go to App

+ Summary: A responsive website for a local pizza shop focused on loading lightning-fast landing pages. Utilized Gatsby to deliver critical CSS to the front-end and Sanity as a headless CMS to deliver the data to the client-side.
+ Role: Sole Author
+ Utilized: React, Gatsby, Styled Components, CSS grid/flexbox, CMS, Formik

EXPERIENCE

Whimser.io, Remote — *Frontend Engineer*

May 2021 - PRESENT

+ Engineering reusable web and native React components for a cognitive behavioral therapy focused application to allow a user to challenge negative thoughts and understand cognitive distortions.
+ Utilizing agile software development strategies to prototype, implement and deploy features embedded within a cross function and multi-disciplinary team.
+ Implementing industry React and React Native best practices within Expo and Next.js environments to maximize the reusability and extensibility of my code.

Bond NY, New York, NY— Residential Real Estate Broker

June 2015 - PRESENT

+ Proven ability to increase agency revenue by an additional $1MM year-over-year, while closing contracts and acquiring clients through Email Marketing and Digital Marketing.
+ Managed and trained junior agents in order to aid in the development of their sales presence.
+ Provide competitive analysis and industry benchmarking of NY Real Estate Market in order to properly position the firm's strategies against competitors.
